Instructions to create new survey content on ckan

Follow the next steps to create new survey content

1. Go to https://surveyjs.io/Examples/Survey-Creator ;
2. Now, in 'Survey Designer' tab, you can create your own survey. It's possible to follow two paths:
   a. Use the toolbox and their properties to create a valid form.
   b. Use the json bellow and follow the instructions in *'Example of JSON data generated in surveyjs'*.
3. When you finished the survey, go again to 'JSON Editor' tab;
4. Copy the generated data and save it in a local file (<name>.json);
5. Now, just upload the file into the correct resource.

Steps to import and changed JSON data generated in surveyjs

Note: This json can be imported to surveyjs to visualize the output or reuse it for your own purposes

- Go to:
  - *'JSON Editor'* (last tab);
  - past the json data bellow ({"pages": [...], ...});
  - go to *'Survey Designer'* tab to visualize it;
  - change it on this tab.

Example of JSON Data to use in surveyjs

```
